Re: Wyoming Mineral Corp.
Westinghouse (Parent Corp.)
Proposed uranium operation

Dear Mr. Dalley:

Wyoming Mineral Corporation has contacted the Division of Oil, Gas, and Mining concerning their plans for a proposed uranium recovery plant in the State of Utah. This letter is an invitation to you to represent your Division at a meeting with Wyoming Mineral Corporation, to discuss their proposed plans.

The exact location at this point is unknown, but the plans call for the location to be adjacent to an existing copper leaching operation. The process to be used will be a resin exchange to produce yellow cake in a slurry form. No air drying will be performed on site.

We hope to address your concerns at this meeting, which will be held here at the Division of Oil, Gas, and Mining, at 10:00 A.M., on March 3rd, 1976.

Yours truly,

Ronald W. Daniels
Coordinator of Mined
Land Reclamation
